Clinical Biomechanics 1989; 4: Printed in Great Britain

Index Volume 3 1988

Titles

Abstracts, 50
Accelerations of lumbar vertebrae and estimation of internal spinal load during sinusoidal vertical whole-body vibration: a pilot study, bidimensional, 241
Age-dependent mechanical behaviour of deep articular cartilage: model construction and simulated failure, a constitutive study of the, 204
Altered knee laxity pattern as a predisposing factor to injury of the medial meniscus (Brief Report), 34
Ambulation, below-knee cast design and the energy cost of, 74
Anatomy, motion, development and ageing of the upper and lower cervical disc segments (Review), differences in, 37
Ankle disc training on muscular strength and, postural control, effects of, 88
Ankle joint (Thesis summary), functional instability of the, 223
Ankle joint forces during steps and jumps down from, two different heights, knee and, 92
Ankle orthosis, exercise moderation of foot function during walking with a re-usable semirigid, 153
ASME 1987 Biomechanics Symposium, edited by DL Butler and PA Torzilli (Book Review), 192
Assessment of human hemiplegic spasticity by a resonant frequency method, 173
Attenuation, skeletal transients during heel and toe strike running and the effectiveness of some materials in their, 159

Behaviour of the spine under shock and vibration (Symposium introduction), 225
Behaviour of the spine under shock and vibration: a review, 249
Below-knee cast design and the energy cost of ambulation, 74
Bidimensional accelerations of lumbar vertebrae and estimation of internal spinal load during sinusoidal vertical whole-body vibration: a pilot study, 241
Biomechanical measurements of back shape and interface pressures in unsupported sitting (Brief Report), 114
Biomechanical model to quantify shoulder load at the work place, 124
Bone growth (Letters), exercise and, 49
Book Review, ASME 1987 Biomechanics Symposium, edited by DL Butler and PA Torzilli, 192
Book Review, The Ageing Spine, edited by DWL Hukins and MA Nelson, 192

Cartilage: model construction, and simulated failure, a constitutive study of the age-dependent mechanical behaviour of deep articular, 204
Cast design and the energy cost of ambulation, below-knee, 74
Cervical spine position versus e.m.g. activity in neck muscles during maximum isometric neck extension, 129
Chair, posture, acceptability and energy consumption on a tiltable and a knee-support, 66
Clinical effects of shock and vibration on the spine, 227
Configuration changes following osteopathic therapy: a pilot study, low back, 197
Constitutive study of the age-dependent mechanical behaviour of deep articular cartilage: model construction and simulated failure, 204
Continuing expansion (Editorial), 196
CT scans, moment arms of spinal musculature determined from, 137

Differences in anatomy, motion, development and ageing of the upper and lower cervical disc segments (Review), 37
Differentiation of maximal and submaximal knee extension efforts by isokinetic testing, 215
Disc segments (Review), differences in anatomy, motion, development and ageing of the upper and lower cervical, 37
Discs, stress and strain of human lumbar, 232
Driving, some effects on the spine from, 235

E.m.g. examination of the effects of load on human gait (Brief Report), 118
E.m.g./moment relationships in neck muscles during isometric cervical spine extension, 58
Editorial, Continuing expansion, 196
Editorial, Statistics and scientific experiment, 195
Editorial, 3, 123
Effects of ankle disc training on muscular strength and postural control, 88
Elderly, gait characteristics of the, 79
Exercise and bone growth (Letters), 49
Exercise moderation of foot function during walking with a re-usable semirigid ankle orthosis, 153

Foot function during walking with a re-usable semirigid ankle orthosis, exercise moderation of, 153
Force plate measurements for an osteoarthritic gait (Brief Report), Legendre polynomial coefficients in the analysis of the horizontal and lateral component of the, 219
Frequency method, the assessment of human hemiplegic spasticity by a resonant, 173
Functional biomechanics of the thoracolumbar vertebral cortex, 11
Functional instability of the ankle joint (Thesis summary), 223
Fusion for spondylotic myelopathy—a radiographic study, mobility of the cervical spine after anterior interbody, 19

Gait (Brief Report), an electromyographic examination of the effects of load on human, 118
Gait (Brief Report), Legendre polynomial coefficients in the analysis of the horizontal and lateral component of the force plate measurements for an osteoarthritic, 219
Gait and upright stance (Thesis summary), on analysis and clinical measurement of, 222
Gait characteristics of the elderly, 79
Gender and somatotype differences in postural alignment: response to high-heeled shoes and simulated weight-gain, 145

Image processing method for spine kinematics—preliminary studies, 5
Industrial seating and spinal loading (Thesis summary), 224
Instability of the ankle joint (Thesis summary), functional, 223
Intra-abdominal pressure (Letters), 48
Isokinetic testing, differentiation of maximal and submaximal knee extension efforts by, 215

Joint forces during steps and jumps down from two different heights, knee and ankle, 92
Joints in the lumbar spine, mechanical function of facet, 101

Kinematics —, preliminary studies, an image processing method for spine, 5
Knee and ankle joint forces during steps and jumps down from two different heights, 92
Knee extension efforts by isokinetic testing, differentiation of maximal and submaximal, 215
Knee laxity pattern as a predisposing factor to injury of the medial meniscus (Brief Report), altered, 34
Knee-support chair, posture, acceptability and energy consumption on a tiltable and a, 66

Legendre polynomial coefficients in the analysis of the horizontal and lateral component of the force plate measurements for an osteoarthritic gait (Brief Report), 219
Letters, Exercise and bone growth, 49
Letters, Intra-abdominal pressure, 48
Load during sinusoidal vertical whole-body vibration: a pilot study, bidimensional accelerations of lumbar vertebrae and estimation of internal spinal, 241
Load on human gait (Brief Report), an electromyographic examination of the effects of, 118
Loading (Thesis summary), industrial seating and spinal, 224
Low back configuration changes following osteopathic therapy: a pilot study, 197
Lower extremity muscle strength in soccer players (Thesis summary), 222
Lumbar discs, stress and strain of human, 232
Lumbar sagittal mobility and their predictive, value in the natural history of back and sciatic pain (Thesis summary), patterns of, 190
Lumbar sagittal mobility, reference values for 'normal' regional, 106
Lumbar trunk muscles during lateral bending, relaxation phenomenon in, 166

Mechanical function of facet joints in the lumbar spine, 101
Meniscus (Brief Report), altered knee laxity pattern as a predisposing factor to injury of the medial, 34
Mobility and their predictive value in the natural history of back and sciatic pain (Thesis summary), patterns of lumbar sagittal, 190
Mobility of the cervical spine after anterior interbody fusion for spondylotic myelopathy—a radiographic study, 19
Mobility, reference values for 'normal' regional lumbar sagittal, 106
Moment arms of spinal musculature determined from CT scans, 137
Muscle strength in soccer players (Thesis summary), lower extremity, 222
Muscles during isometric cervical spine extension, e.m.g./moment relationships in neck, 58
Muscles during lateral bending, relaxation phenomenon in lumbar trunk, 166
Muscles during maximum isometric neck extension, cervical spine position versus e.m.g. activity in neck, 129

Neck muscles during maximum isometric neck extension, cervical spine position versus e.m.g. activity in, 129

On analysis and clinical measurement of gait and upright stance (Thesis summary), 222
Osteopathic therapy: a pilot study, low back configuration changes following, 197
Osteopenia due to rigid plating (Review), stress protection, 179

Patterns of lumbar sagittal mobility and their predictive value in the natural history of back and sciatic pain (Thesis summary), 190
Plating (Review), stress protection osteopenia due to rigid, 179
Postural alignment: response to high-heeled shoes and simulated weight-gain, gender and somatotype differences in, 145
Posture, acceptability and energy consumption on a tiltable and a knee-support chair, 66
Pressure (Letters), intra-abdominal, 48
Pressure during diagnostic shoulder tests, (Brief Report), subacromial, 187
Pressures in unsupported sitting (Brief Report), biomechanical measurements of back shape and interface, 114

Reference values for 'normal' regional lumbar sagittal mobility, 106
Relaxation phenomenon in lumbar trunk muscles during lateral bending, 166
Running and the effectiveness of some materials in their attenuation, skeletal transients during heel and toe strike, 159

Seating and spinal loading (Thesis summary), industrial, 224
Shock and vibration (Symposium introduction), behaviour of the spine under, 225
Shock and vibration on the spine, clinical effects of, 227
Shock and vibration: a review, behaviour of the spine under, 249
Shoulder load at the work place, a biomechanical model to quantify, 124
Shoulder tests (Brief Report), subacromial pressure during diagnostic, 187
Sitting (Brief Report), biomechanical measurements of back shape and interface pressures in unsupported, 114
Skeletal transients during heel and toe strike running and the effectiveness of some materials in their attenuation, 159
Somatotype differences in postural alignment: response to high-heeled shoes and simulated weight-gain, gender and, 145
Some effects on the spine from driving, 235
Spasticity by a resonant frequency method, the assessment of human hemiplegic, 173
Spinal musculature determined from CT scans, moment arms of, 137
Spine after anterior interbody fusion for spondylotic myelopathy—a radiographic study, mobility of the cervical, 19
Spine extension, e.m.g./moment relationships in neck muscles during isometric cervical, 58
Spine from driving, some effects on the, 235
Spine kinematics —, preliminary studies, an image processing method for, 5
Spine, mechanical function of facet joints in the lumbar, 101
Spine: a biomechanical study, stability of the human, 27
Stability of the human spine: a biomechanical study, 27
Stance (Thesis summary), on analysis and clinical measurement of gait and upright, 222
Statistics and scientific experiment (Editorial), 195
Strength in soccer players (Thesis summary), lower extremity muscle, 222
Stress and strain of human lumbar discs, 232
Stress protection osteopenia due to rigid plating (Review), 179
Subacromial pressure during diagnostic shoulder tests (Brief Report), 187

The Ageing Spine edited by DWL Hukins and MA Nelson (Book Review), 192
Training on muscular strength and postural control, effects of ankle disc, 88

Vertebral cortex, functional biomechanics of the thoracolumbar, 11
Vibration (Symposium introduction), behaviour of the spine under shock and, 225
Vibration on the spine, clinical effects of shock and, 227
Vibration: a review, behaviour of the spine under shock and, 249

Work place, a biomechanical model to quantify shoulder load at the, 124

Clinical Biomechanics 1989; **4**: Printed in Great Britain
